IsoRay, Inc. (NYSE/ISR)

September 26, 2019

BUY: Slow and Steady Wins the Race

IsoRay reported the fiscal fourth quarter with revenues of \$1.9M with almost all the sales coming from the prostate market. The net loss in the period was just over \$1M, with \$5M on the balance sheet. Management discussed the rollout of the "Blue-Build" delivery system as a new tool that is helping to interest new users.

Jason H. Kolbert
 Head of Healthcare Research

 jkolbert@dawsonjames.com

Investment Highlights:

The Power of Blu. On June 12th, 2019 IsoRay announced that they would be opening up a new campaign initiative called the "The Power of Blu". This launch took place at the ABS 2019 conference, held on June 13-15. The campaign reintroduce IsoRay's Cesium-131, now known as Cesium Blu. This name change embodies the companies continued growth and awareness of the power of Cesium as an alternative option in the oncology community.

Brachytherapy Back on the Throne. Toward the end of 2018, Alex Azar, the United States Secretary of Health and Human Services publicly stated that the CMS, under Trump's Administration's advisement, plans on grouping radiation oncology therapy into the mandatory bundle payment model. When this takes effect at the end of the summer it should help drive market share back to prostate cancer - brachytherapy. Initiation of a capitated system (one fee for treatment) should drive hospitals to evaluate where they can achieve the best outcome for patients at the lowest cost. We believe, radiation therapy will be one of the answers. Recall that the cost of the Cs-131 seeds that IsoRay provides are covered outside the bundle.

New Branding - Blu Build. Earlier this year, Dr. David T. Marshall, a professor of Oncology and Urology at the Hollings Cancer Center, which is part of the University of South Carolina, performed the first prostate cancer surgery using the Blu Build real-time Cesium-131 brachytherapy delivery system. Dr. Marshall believes that the Blu Build technology can have a significant impact in the marketplace, stating, "No two patients are exactly alike. What Blu Build provides physicians is a real-time means to individually customize and deliver a precise placement of Cesium-131 brachytherapy seeds tailored to the patient's anatomy and cancer as the physician is seeing it in the operating room at the time of surgery." The main goal of the Blu Build model aligns perfectly with IsoRay's mission statement, "IsoRay advances innovative radiotherapeutic technologies that focus on the patient." The advantages of this system are all catered to the safety and efficacy of the patient. Cesium Blu introduces patients to a life of improved quality. It is able to directly target the tumor, minimizing damage to other tissue, as a result of the shorter half-life (Cesium-131) compared to the other radioisotopes on the market. With a competitive price and a customized procedure model, the stage is set for Blu Build to be an effective (efficacy & cost) treatment for not only prostate cancer, but also other hard to treat cancers in the brain, pelvis, gyn, head, neck, lung, colon, and rectal areas.

A Key Collaboration Opportunity. IsoRay Inc. has established an important connection with the Texas Oncology group, an independent oncology practice with over 210 locations in Texas and around 460 working physicians. This new training collaboration was announced on April 16, 2019, and will aid in public awareness of brachytherapy and the revolutionary capability of Cesium-131. The goal of this program is to help train the next generation of brachytherapists using several different approaches like case observations, practice on artificial prostates, physics planning, and real-time procedure methodology. These video tutorials can all be accessed through their webinar.

Valuation: We model Cesium Blu in both prostate and non-prostate cancer markets; however, we see the real driver as the prostate cancer marketplace. Adoption of GammaTile for brain cancer treatment should begin to increase over the next few years generating more Cs-131 seeds sales (to GT Medical), but for conservatism, we apply only a 10% probability of success that our market share estimates will be fully realized. Using these metrics, we model the market potential and discount back using a 15% rate in our FCF, discounted EPS, and sum-of-the-parts models to arrive at a \$1.00 price target. These metrics are dependent on our clinical assumptions.

Risk Factors: Investment Risk, Market Share Risk, Regulatory Risk, Commercial Risk, and Financial Risk

Modeling Assumptions:

1. We assume continued growth of the patient incidence and prevalence of prostate cancer. We also assume that brachytherapy can become a larger part of the over-all prostate cancer therapy marketplace. We currently assume brachytherapy is under 10% and over the next decade and rise to 17%. Within the brachytherapy marketplace, Cs-131 has just a 5% market share. We assume that share can rise by 23% over the next decade.
2. Pricing. We assume on average \$70 per seed and 50 seeds per case in PC. Please see the market model below for our assumptions in non-prostate indications.
3. For IsoRay, and a result of the complexities of Isotope management, there may be a significant reduction in the cost of manufacturing associated with the volume.
4. GammaTile. We model the recurrent brain cancers marketplace (300,000 cases per year) and assume the market is based on the 75% of patients who may undergo tumor resection. At just 3% market share, \$150 per seed and 65 seeds on average, the market becomes significant at \$86M annually. We apply just a 10% probability that the full commercial opportunity can be realized based on GT Medical's ability to invest the needed capital to aggressively change the current treatment paradigm.

VALUATION

We see IsoRay as an established company that has commercialized an approved product that has strong product attributes. Revenue today are small at just \$6M annually, but we believe these revenues, with our modest assumptions, can grow over the coming decade. For these reasons, we apply a 15% risk rate. Typically for early stage companies with no approved products which possess a lot of clinical risks we use a 30% risk rate and for established companies with more predictable revenues and typically cash flow positive we apply a 10% risk rate. We model the company's revenues (and expenses) out to 2030. We consider the need to raise capital, and as such, we use a future projected share count. We then apply these metrics to our free cash flow to the firm (FCFF), Discounted earnings (dEPS) and the sum of the parts (SOP) model, which are equal weighted, averaged and rounded to the nearest whole number. This method results in a \$1.00 price target for IsoRay.

Risk Analysis:

Investment Risk: IsoRay is a small capital company, which can translate into high volatility and risk for investors. The company's revenues depend on one product with multiple applications. Prostate cancer treatment accounted for greater than three-fourths of product sales, and the prostate cancer market has been declining.

Market Share Risk. IsoRay faces well-entrenched competition within the brachytherapy marketplace as well as outside the marketplace from well-capitalized large pharma and biotechnology companies.

Regulatory Risk: Barium is the main raw material used to make Cesium-131. IsoRay relies heavily on the production of Barium. The main supplier of Cesium-131 is in Russia, so the majority of the production of Cesium is dependent on U.S. - Russian relations. The manufacturing facilities all need to pass certain standards of operation in order to be functionally running.

Commercial Risk: End consumers may believe that there is a lack of product doses for Cesium 131, and radiation therapy represents a complication for some providers.

Financial Risk: IsoRay is likely to have additional capital raises before the company can be self-sustaining.

Price target and rating changes over the past three years:

Initiated – Buy – July 1, 2019 – Price Target \$1.00
Update – Buy – September 26, 2019 – Price Target \$1.00

Dawson James Securities, Inc. (the “Firm”) is a member of the Financial Industry Regulatory Authority (“FINRA”) and the Securities Investor Protection Corporation (“SIPC”).

The Firm does not make a market in the securities of the subject company(s). The Firm has NOT engaged in investment banking relationships with ISR in the prior twelve months, as a manager or co-manager of a public offering and has NOT received compensation resulting from those relationships. The Firm may seek compensation for investment banking services in the future from the subject company(s). The Firm has NOT received any other compensation from the subject company(s) in the last 12 months for services unrelated to managing or co-managing of a public offering.

Neither the research analyst(s) whose name appears on this report nor any member of his (their) household is an officer, director or advisory board member of these companies. The Firm and/or its directors and employees may own securities of the company(s) in this report and may increase or decrease holdings in the future. As of August 31, 2019, the Firm as a whole did not beneficially own 1% or more of any class of common equity securities of the subject company(s) of this report. The Firm, its officers, directors, analysts or employees may effect transactions in and have long or short positions in the securities (or options or warrants related to those securities) of the company(s) subject to this report. The Firm may affect transactions as principal or agent in those securities.

Analysts receive no direct compensation in connection with the Firm's investment banking business. All Firm employees, including the analyst(s) responsible for preparing this report, may be eligible to receive non-product or service specific monetary bonus compensation that is based upon various factors, including total revenues of the Firm and its affiliates as well as a portion of the proceeds from a broad pool of investment vehicles consisting of components of the compensation generated by investment banking activities, including but not limited to shares of stock and/or warrants, which may or may not include the securities referenced in this report.

Although the statements in this report have been obtained from and are based upon recognized statistical services, issuer reports or communications, or other sources that the Firm believes to be reliable, we cannot guarantee their accuracy. All opinions and estimates included in this report constitute the analyst’s judgment as of the date of this report and are subject to change without notice.

Information about valuation methods and risks can be found in the “STOCK VALUATION” and “RISK ANALYSIS” sections of this report.

The securities of the company discussed in this report may be unsuitable for investors depending on their specific investment objectives and financial position. This report is offered for informational purposes only and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such would be prohibited. Additional information is available upon request.

Rating Definitions:

- 1) **Buy:** The analyst believes the price of the stock will appreciate and produce a total return of at least 20% over the next 12-18 months;
- 2) **Neutral:** The analyst believes the price of the stock is fairly valued for the next 12-18 months;
- 3) **Sell:** The analyst believes the price of the stock will decline by at least 20% over the next 12-18 months and should be sold.

The following chart reflects the range of current research report ratings for all companies followed by the analysts of the Firm. The chart also reflects the research report ratings relating to those companies for which the Firm has performed investment banking services.

Ratings Distribution	Company Coverage		Investment Banking	
	# of Companies	% of Total	# of Companies	% of Totals
Market Outperform (Buy)	27	82%	5	19%
Market Perform (Neutral)	6	18%	0	0%
Market Underperform (Sell)	0	0%	0	0%
Total	33	100%	5	15%

Analyst Certification:

The analyst(s) whose name appears on this research report certifies that 1) all of the views expressed in this report accurately reflect his (their) personal views about any and all of the subject securities or issuers discussed; and 2) no part of the research analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst in this research report; and 3) all Dawson James employees, including the analyst(s) responsible for preparing this research report, may be eligible to receive non-product or service specific monetary bonus compensation that is based upon various factors, including total revenues of Dawson James and its affiliates as well as a portion of the proceeds from a broad pool of investment vehicles consisting of components of the compensation generated by investment banking activities, including but not limited to shares of stock and/or warrants, which may or may not include the securities referenced in this report.
