

Dare Bioscience (NASDAQ/DARE)

BUY: Timelines on Track & Preserves Capital Through the Use of an At The Market Facility (ATM).

Dare held the first-quarter call. The company spent \$4.2M and raised \$6.9M through the use of its ATM facility. The company ended the period with \$4.8M in cash and did raise in 2Q (\$2M). We assume additional raises/dilution. Management focus remains on the timelines for critical products in the year ahead.

Investment Highlights

BV-1 “One & Done”. DARE-BV1 is in development for bacterial vaginosis (BV). Differentiating characteristics include a gel technology (w/Clindamycin) which allows for local delivery and a one-time application. With high cure rates, as high as 86% just 7-14 days after a single administration, the product appears superior to the standard of care treatments that average 50%. A Phase 3 study is expected to begin in July with a data read-out by year-end, setting up a 2021 filing.

Ovaprene. Dare has announced plans to file an Investigational Device Exemption (IDE) for Ovaprene (a once monthly product) in 2020. Upon FDA acceptance the company would then initiate a pivotal contraceptive effectiveness and safety clinical study of Ovaprene in the 2H of this year. The goal being to, based on this trial, pursue U.S., European and other key countries and realize Bayer’s opt-in.

Female Viagra. Yes, Its time. Female Sexual Arousal Disorder – FSAD is real, and Sildenafil cream (the active ingredient of Viagra) has shown efficacy to address a segment of the female population (10M plus sexually active women) that are currently living with the disorder. Although FSAD affects more women than erectile dysfunction affects men, there are currently no approved products on the market. Phase 2b trial top-line data by YE-2021.

Bayer Deal Terms. Dare receives a modest upfront payment and access to Bayer’s clinical and market capabilities which will include several of Bayer’s clinical people working with Dare on the clinical next steps. Dare retains control over the product – clinical development & the regulatory process. If Bayer, in its sole discretion, makes payment to Dare of \$20 million for clinical expenses, the deal becomes effective. Terms include milestones of up to \$310 million and tiered double-digit royalties on net sales.

Valuation: We assume that DARE-BV1 can be commercialized in 2022 and that Ovaprene can follow in the U.S. in 2023 and in the EU in 2025. For Sildenafil cream, we expect commercialization in the U.S. in 2024 and in the EU in 2026. We assume a 30% discount rate in our Free Cash Flow to the Firm (FCFF), Discounted EPS (dEPS), and Sum-of-the-Parts (SOP) models due to the risks associated with each product. This results in models which are equally weighted and rounded to the nearest whole number with a \$3.0 price target.

Risk to our thesis, include the following: (1) commercial; (2) regulatory; (3) clinical; (4) manufacturing; (5) financial; (6) liability; and (7) intellectual property.

Modeling Assumptions

1. We present therapeutic models for the company's three products, DARE-BV1, Ovaprene, and Sildenafil. For each of these products, we apply just a 50% probability of success. One could argue that this is conservative as each product has either demonstrated a viable mechanism of action or established proof of concept in well-designed Phase 2 trials.
 - a. DARE-BV1. We assume DARE-BV1 has a 50% probability of success, with commercialization in the U.S. in 2021 with a price of \$200. We assume modest price increases of just 1% annually.
 - b. Ovaprene. We assume Ovaprene has a 50% probability of success, with commercialization in the U.S. in 2023 and in the EU in 2025. We note that an EU trial may not be required to file, depending on U.S. results; however, for conservatism, we assume an EU trial. We assume Ovaprene will have a price comparable to NuvaRing, beginning at \$1650 per year and a y/y price increase of 1%.
 - c. Sildenafil. We assume Sildenafil has a 50% probability of success, with commercialization in the U.S. in 2024 and in the EU in 2025. We assume Sildenafil will have a price comparable to Viagra for men, beginning at \$1950 per year and a y/y price increase of 1%.
2. We assume a royalty product model for all three products. We model a 25% royalty to Dare based on top-line revenues. As part of our calculus, we assume research and development expenses are offset by a partnership that will reduce the financial burden. We do not assume zero R&D, as we expect the company to remain active in both new product development and in the participation of existing products. These assumptions also impact of SG&A line, where we estimate just 10% annual growth in expenses. Our COGS assumptions are set to 17% of revenues, and this may prove to be conservative.
3. Our company valuation is based on a fully diluted out year share count, with capital raises and issued shares in 3Q19 and 1Q20. We use a 30% risk rate in our FCF, dEPS, and SOP models. This risk rate is in addition to our therapeutic models "probability factor."

Valuation. We apply therapeutic probabilities of success in our product models, see model assumptions for complete details. For all three products, we apply a 50% probability. To this, we then apply a 30% discount rate on our Free Cash Flow to the Firm, Discounted EPS, and Sum-of-the-Parts models, which are equally weighted, averaged and rounded to the nearest whole number to derive our \$3.00 price target. Our assumptions are based on out-year estimates (2030) and assume a fully diluted share count (assume multiple capital raises).

Risk Analysis

In addition to the typical risks associated with development stage specialty pharmaceutical companies, potential risks specific to Dare are as follows:

Financial risk. The company may need to raise capital in the marketplace in order to successfully push its products into the next phase, and there can be no assurances that the company will be able to successfully raise capital and or do so on favorable terms.

Clinical and regulatory risk. Lead products must start and complete clinical trials. Trials may not produce results sufficient for regulatory approval.

Partnership risk. Dare may seek partnerships for clinical development support and commercialization. We have no specific knowledge of any discussions with possible partners today, and there can be no assurances that the company will be able to secure a favorable partnership.

Commercial risk. There are no assurances that the company will be able to secure favorable pricing, commercially launch products, and achieve significant market share to become profitable.

Legal and intellectual property risk. The company may have to defend its patents and technical know-how, and there can be no assurances that the patents will not be infringed or will be held as valid if challenged, and or that the company may infringe on third party's patents.

Dawson James Securities, Inc. (the “Firm”) is a member of the Financial Industry Regulatory Authority (“FINRA”) and the Securities Investor Protection Corporation (“SIPC”).

The Firm does not make a market in the securities of the subject company(s). The Firm has NOT engaged in investment banking relationships with Dare in the prior twelve months, as a manager or co-manager of a public offering and has NOT received compensation resulting from those relationships. The Firm may seek compensation for investment banking services in the future from the subject company(s). The Firm has received any other compensation from the subject company(s) in the last 12 months for services unrelated to managing or co-managing of a public offering.

Neither the research analyst(s) whose name appears on this report nor any member of his (their) household is an officer, director or advisory board member of these companies. The Firm and/or its directors and employees may own securities of the company(s) in this report and may increase or decrease holdings in the future. As of April 30, 2020, the Firm as a whole did not beneficially own 1% or more of any class of common equity securities of the subject company(s) of this report. The Firm, its officers, directors, analysts or employees may affect transactions in and have long or short positions in the securities (or options or warrants related to those securities) of the company(s) subject to this report. The Firm may affect transactions as principal or agent in those securities.

Analysts receive no direct compensation in connection with the Firm's investment banking business. All Firm employees, including the analyst(s) responsible for preparing this report, may be eligible to receive non-product or service specific monetary bonus compensation that is based upon various factors, including total revenues of the Firm and its affiliates as well as a portion of the proceeds from a broad pool of investment vehicles consisting of components of the compensation generated by investment banking activities, including but not limited to shares of stock and/or warrants, which may or may not include the securities referenced in this report.

Although the statements in this report have been obtained from and are based upon recognized statistical services, issuer reports or communications, or other sources that the Firm believes to be reliable, we cannot guarantee their accuracy. All opinions and estimates included in this report constitute the analyst's judgment as of the date of this report and are subject to change without notice.

Information about valuation methods and risks can be found in the “STOCK VALUATION” and “RISK FACTORS” sections of this report.

The securities of the company discussed in this report may be unsuitable for investors depending on their specific investment objectives and financial position. This report is offered for informational purposes only and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such would be prohibited. Additional information is available upon request.

Rating Definitions:

- 1) **Buy:** the analyst believes the price of the stock will appreciate and produce a total return of at least 20% over the next 12-18 months;
- 2) **Neutral:** the analyst believes the price of the stock is fairly valued for the next 12-18 months;
- 3) **Sell:** the analyst believes the price of the stock will decline by at least 20% over the next 12-18 months and should be sold.

The following chart reflects the range of current research report ratings for all companies, followed by the analysts of the Firm. The chart also reflects the research report ratings relating to those companies for which the Firm has performed investment banking services.

Ratings Distribution	Company Coverage		Investment Banking	
	# of Companies	% of Total	# of Companies	% of Totals
Market Outperform (Buy)	22	92%	3	14%
Market Perform (Neutral)	2	8%	1	50%
Market Underperform (Sell)	0	0%	0	0%
Total	24	100%	4	17%

Analyst Certification:

The analyst(s) whose name appears on this research report certifies that 1) all of the views expressed in this report accurately reflect his (their) personal views about any and all of the subject securities or issuers discussed; and 2) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst in this research report; and 3) all Dawson James employees, including the analyst(s) responsible for preparing this research report, may be eligible to receive non-product or service-specific monetary bonus compensation that is based upon various factors, including total revenues of Dawson James and its affiliates as well as a portion of the proceeds from a broad pool of investment vehicles consisting of components of the compensation generated by investment banking activities, including but not limited to shares of stock and/or warrants, which may or may not include the securities referenced in this report.
