BUY Great Data in Rett Syndrome; We Are Buyers

Jason Kolbert
 Senior Analyst

jkolbert@dawsonjames.com

Anavex reported P3 data for the Rett Syndrome trial (Anavex 2-73). The primary endpoints of RSBQ AUC demonstrated statistically significant and clinically meaningful improvements in 72.2% of patients as compared to 38.5% on placebo; ($p = 0.037$) with a Cohen's d effect size of 1.91 (very large). The secondary efficacy endpoints also demonstrated statistically significant and clinically meaningful improvements. In our opinion, the stock should be up (not down). The negative thesis claims the company changed the endpoints during the trial; management assures us that is not accurate. We see the potential for approval based on this data.

Investment Highlights – The Data

- Primary (RSBQ AUC; $p = 0.037$) and secondary (ADAMS; $p = 0.010$); (CGI-I; $p = 0.037$) efficacy endpoints met.
- ANAVEX@2-73 induces a statistically significant and clinically meaningful improvement of RSBQ AUC in 72.2% of patients as compared to 38.5% on placebo; ($p = 0.037$). Cohen's d effect size is 1.91 (very large).
- Clinically meaningful and statistically significant reduction of emotional behavior symptoms (ADAMS) in ANAVEX@2-73 treated adult patients with Rett syndrome (52.9%) vs. placebo (8.3%); ($p = 0.010$). Cohen's d effect size 0.609 (large).
- Significantly more patients achieve clinically meaningful CGI-I response over the treatment duration in ANAVEX@2-73-treated group (72.2%) as compared with placebo (38.5%); ($p = 0.037$). Cohen's d effect size 1.91 (very large).
- Efficacy endpoints demonstrated statistically significant and clinically meaningful reductions in Rett syndrome symptoms with related changes in potential biomarkers of disease pathology:
 - GABA was significantly increased ($p = 0.0205$).
 - L-Alpha-aminoadipic acid (L-AAA) was significantly decreased ($p = 0.0392$).
- Confirmed dose-response:
 - RS-001 study 5mg ANAVEX@2-73 dose RSBQ AUC Cohen's d (effect size) of 0.517.
 - RS-002 study 30mg ANAVEX@2-73 dose RSBQ AUC Cohen's d (effect size) of 1.91.
- ANAVEX@2-73 demonstrated dose-related significant improvement in overall Quality of Life (QoL) measured with CHQ-PF50 ($p = 0.030$).

Valuation. Our valuation is based on our therapeutic models and associated assumptions projected to 2030. Our model assumes multiple financial raises, and as such, our share count is based on a projected, fully diluted out-year basis. Given the early nature of the company and its dependence on clinical trial outcomes in the CNS space, we apply a probability of success (50%) in our models. On top of this, we also add a 30% risk rate in our free cash flow to the Firm (FCFF), our discounted EPS (dEPS), and sum-of-the-parts (SOP) models. We equal weight and average these metrics and then round to the nearest whole number to derive our price target.

Risks to our thesis include: (1) commercial; (2) regulatory; (3) clinical; (4) market share; (5) financial; (6) investment; and (7) intellectual property.

 Current Price **\$10.55**
 Price Target **\$35.00**

Risk Analysis

Clinical Trial Risk. Anavex is dependent on the outcome of multiple clinical trials. The failure rates associated with disease conditions such as Alzheimer's are historically very high.

Commercial Risk. Anavex hopes to compete in the CNS markets, which have traditionally been dominated by large pharma and biotechnology companies with deep pockets (funding and resources), which may make it difficult for Anavex to compete unless the molecule is deemed to be truly differentiated.

Financial Risk. Anavex is likely to require additional capital raises before the company can be self-sustaining. There can be no guarantees that the company will be able to raise the needed capital.

Investment Risk. Anavex is a small capital company, which can translate into high volatility and risk for investors. The company has no revenues and is dependent on the clinical progress of its therapeutics.

Intellectual Property. Anavex may face I.P. challenges, forcing the company to defend its patents or itself against claims that the company is infringing on other patents. We do know that the lead product is protected by a composition of matter patent to 2033.

Market Share Risk. The central nervous system (CNS) market is competitive and tends to be dominated by large pharma and large well established biotechnology companies.

Regulatory Risk. Anavex, even with good clinical data, could face extensive delays and other regulatory setbacks.

Dawson James Securities, Inc. (the "Firm") is a member of the Financial Industry Regulatory Authority ("FINRA") and the Securities Investor Protection Corporation ("SIPC").

The Firm does not make a market in the securities of the subject company(s). The Firm has NOT engaged in investment banking relationships with AVXL in the prior twelve months, as a manager or co-manager of a public offering and has NOT received compensation resulting from those relationships. The Firm may seek compensation for investment banking services in the future from the subject company(s). The Firm has NOT received any other compensation from the subject company(s) in the last 12 months for services unrelated to managing or co-managing of a public offering.

Neither the research analyst(s) whose name appears on this report nor any member of his (their) household is an officer, director or advisory board member of these companies. The Firm and/or its directors and employees may own securities of the company(s) in this report and may increase or decrease holdings in the future. As of January 27, 2022, the Firm as a whole did not beneficially own 1% or more of any class of common equity securities of the subject company(s) of this report. The Firm, its officers, directors, analysts or employees may affect transactions in and have long or short positions in the securities (or options or warrants related to those securities) of the company(s) subject to this report. The Firm may affect transactions as principal or agent in those securities.

Analysts receive no direct compensation in connection with the Firm's investment banking business. All Firm employees, including the analyst(s) responsible for preparing this report, may be eligible to receive non-product or service specific monetary bonus compensation that is based upon various factors, including total revenues of the Firm and its affiliates as well as a portion of the proceeds from a broad pool of investment vehicles consisting of components of the compensation generated by investment banking activities, including but not limited to shares of stock and/or warrants, which may or may not include the securities referenced in this report.

Although the statements in this report have been obtained from and are based upon recognized statistical services, issuer reports or communications, or other sources that the Firm believes to be reliable, we cannot guarantee their accuracy. All opinions and estimates included in this report constitute the analyst's judgment as of the date of this report and are subject to change without notice.

Information about risks can be found in the "RISK ANALYSIS" section of this report.

The securities of the company discussed in this report may be unsuitable for investors depending on their specific investment objectives and financial position. This report is offered for informational purposes only and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such would be prohibited. Additional information is available upon request.

Rating Definitions:

- 1) **Buy:** The analyst believes the price of the stock will appreciate and produce a total return of at least 20% over the next 12-18 months;
- 2) **Neutral:** The analyst believes the price of the stock is fairly valued for the next 12-18 months;
- 3) **Sell:** The analyst believes the price of the stock will decline by at least 20% over the next 12-18 months and should be sold.

The following chart reflects the range of current research report ratings for all companies followed by the analysts of the Firm. The chart also reflects the research report ratings relating to those companies for which the Firm has performed investment banking services.

Current as of... 31-Jan-22

	Company Coverage		Investment Banking	
Ratings Distribution	# of Companies	% of Total	# of Companies	% of Totals
Market Outperform (Buy)	29	73%	6	21%
Market Perform (Neutral)	11	28%	0	0%
Market Underperform (Sell)	0	0%	0	0%
Total	40	100%	6	15%

Analyst Certification:

The analyst(s) whose name appears on this research report certifies that 1) all of the views expressed in this report accurately reflect his (their) personal views about any and all of the subject securities or issuers discussed; and 2) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst in this research report; and 3) all Dawson James employees, including the analyst(s) responsible for preparing this research report, may be eligible to receive non-product or service specific monetary bonus compensation that is based upon various factors, including total revenues of Dawson James and its affiliates as well as a portion of the proceeds from a broad pool of investment vehicles consisting of components of the compensation generated by investment banking activities, including but not limited to shares of stock and/or warrants, which may or may not include the securities referenced in this report.
