HeartBeam (NASDAQ: BEAT) - Buy

August 12, 2022

Reports 2Q22 – Moving Towards Commercialization

Jason H. Kolbert
Managing Director & Senior Analyst
jkolbert@dawsonjames.com

HeartBeam reported 2nd QTR-22 Results, spending \$3.5M and closing the period with \$9.2M in cash. HeartBeam is on Track for the planned FDA Submissions of the AIMI Software Platform (Emergency Rooms) in Q3 2022 & AIMIGo, the Telehealth Solution, in Q4 2022.

Remote Monitoring and AI with an Emergency Room Assist: HeartBeam’s plans to launch two products (initially). A telehealth product for high-risk cardiovascular patients (remote monitoring) and an AI-diagnostic expert & detection system in the Emergency Rooms (ER). Both hold the promise to improve patient outcomes. The initial telemedicine product addresses coronary artery disease (CAD) and other high risk (MI) patients. The market today lacks a user-friendly, easy to carry and always ready product that can provide physicians and patients with timely and accurate information about potential Acute Coronary Syndrome (ACS) and Myocardial Infarction (MI) events. Intelligent software in the ER can offer a welcome assist and save time during the golden window for patients in need of cardiac care.

What’s the Market Opportunity? It’s large. Simply put, 18M patients in the U.S. have heart disease. This adds up to over \$30B. The number of hospitals using mobile applications is rising sharply (in part as a result of COVID), accelerating a push to tele-health. These 18 million patients are typically seen by 5,000 cardiologists and 5,000 emergency rooms nationwide.

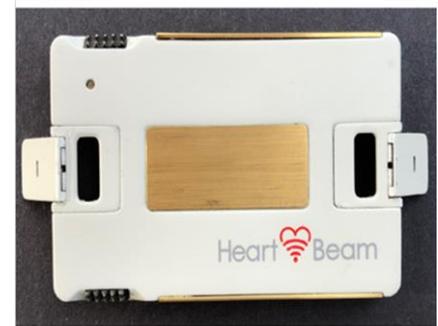

Simple Math: We estimate Remote Monitoring, based on existing reimbursement rates, as worth \$1,400 plus annually. If we assume just a fraction of the 18M patient prevalence become users this equates to a multi-billion-dollar opportunity. 5,000 Emergency Rooms with the potential to license (\$100k annually) smart software (AI) to assist doctors in the detection and treatment of cardiac issues (& ruling out false positives), equates to \$500M market size. In our projected forecast we assume just a fraction of the market becomes RPM (remote patient monitoring) patients. In the ER space we assume up to 30% of ER’s (AI Software) become users by the end of the decade. In addition to our assumed discount rate (30%) we apply a “risk cut” to our projections (30%) and then feed these revenues into our model with appropriate estimates on SG&A and R&D.

How Does it Work? – VCG. The foundation of the company’s technology is based on the concept of vector cardiography (VCG). VCG is viewed as superior to ECGs in detecting heart attacks (MI), but is no longer used clinically because of the difficulty experienced by physicians interpreting the output. This problem has now been solved by recording three orthogonal (x, y and z) projections of the heart vector with a device that is the size of a credit card. The core technology consists of a series of patented inventions and associated algorithms. Several trials have established a clinical data package that support a 510(k) pathway/approval.

Valuation: We project our model out to 2030. We apply a 30% risk cut to our projected revenues in our product model in addition to our 30% risk rate applied in our Free Cash Flow to the Firm (FCFF), discounted EPS (dEPS), and Sum-of-the-Parts (SOP) models. We use a fully diluted year share count assuming multiple raises. The result is equal-weighted and averaged and rounded to the nearest whole number to derive our 12-month projected price target of \$12.0.

Risks to our thesis include: 1. Regulatory Approvals; 2. Clinical Science 3. Adoption Rates 4. The competitive landscape. 5. Intellectual Capital 6. Dilution.

Current Price \$1.54
Price Target \$12.00

Insider Ownership	53.2%
Institutional Ownership	6.5%
Short interest (mil.)	1.1%
Dividend / Yield	\$0.00/0.0%

- **Regulatory Approvals.** The company's products require regulatory approvals, and there can be no assurances that the requirements to achieve these approvals can be met.
- **Clinical Science:** The company will need to demonstrate to its "sophisticated" clients (cardiologists) that the product works and is comparable to the existing standard of care.
- **Adoption Rates:** There are no assurances that our projected market share can be met. A combination of factors from pricing and reimbursement to competitive performance are expected to be key factors in driving users to select the product for both their practices, patients, and the emergency room setting.
- **The Competitive Landscape & IP.** The company does have intellectual property and knows how to protect the utility of its devices and software; however, we expect that the technology cycle is competitive, and the company may face competition from well-financed competitors who are already in position in the target markets.
- **Dilution:** The company is likely to incur losses for the foreseeable future until it is able to generate sufficient revenue from product sales. Our model assumes a rising share count. There can be no assurances that the company can successfully raise the capital required to execute its business strategy.

Dawson James Securities, Inc. (the "Firm") is a member of the Financial Industry Regulatory Authority ("FINRA") and the Securities Investor Protection Corporation ("SIPC").

The Firm does not make a market in the securities of the subject company(s). The Firm has not engaged in investment banking relationships with the subject company in the prior twelve months, as a manager or co-manager of a public offering and has not received compensation resulting from those relationships. The Firm may seek compensation for investment banking services in the future from the subject company(s). The Firm has received other compensation from the subject company(s) in the last 12 months for services unrelated to managing or co-managing of a public offering.

Neither the research analyst(s) whose name appears on this report nor any member of his (their) household is an officer, director, or advisory board member of these companies. The Firm and/or its directors and employees may own securities of the company(s) in this report and may increase or decrease holdings in the future. As of August 1, 2022, the Firm as a whole did beneficially own 1% or more of any class of common equity securities of the subject company(s) of this report. The Firm, its officers, directors, analysts, or employees may affect transactions in and have long or short positions in the securities (or options or warrants related to those securities) of the company(s) subject to this report. The Firm may affect transactions as principal or agent in those securities.

Analysts receive no direct compensation in connection with the Firm's investment banking business. All Firm employees, including the analyst(s) responsible for preparing this report, may be eligible to receive non-product or service-specific monetary bonus compensation that is based upon various factors, including total revenues of the Firm and its affiliates as well as a portion of the proceeds from a broad pool of investment vehicles consisting of components of the compensation generated by investment banking activities, including but not limited to shares of stock and/or warrants, which may or may not include the securities referenced in this report.

Although the statements in this report have been obtained from and are based upon recognized statistical services, issuer reports or communications, or other sources that the Firm believes to be reliable, we cannot guarantee their accuracy. All opinions and estimates included in this report constitute the analyst's judgment as of the date of this report and are subject to change without notice.

Information about valuation methods and risks can be found in the "Valuation" and "Risk Analysis" sections of this report.

The securities of the company discussed in this report may be unsuitable for investors depending on their specific investment objectives and financial position. This report is offered for informational purposes only and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such would be prohibited. Additional information is available upon request.

Ratings Definitions:

- 1) **Buy:** The analyst believes the price of the stock will appreciate and produce a total return of at least 20% over the next 12-18 months.
- 2) **Neutral:** The analyst believes the price of the stock is fairly valued for the next 12-18 months.
- 3) **Sell:** The analyst believes the price of the stock will decline by at least 20% over the next 12-18 months and should be sold.

The following chart reflects the range of current research report ratings for all companies, followed by the analysts of the Firm. The chart also reflects the research report ratings relating to those companies for which the Firm has performed investment banking services.

Current as of 8-Aug-22

	Company Coverage		Investment Banking	
Ratings Distribution	# of Companies	% of Total	# of Companies	% of Totals
Market Outperform (Buy)	29	66%	4	14%
Market Perform (Neutral)	14	32%	0	0%
Market Underperform (Sell)	1	2%	0	0%
Total	44	100%	4	9%

Analyst Certification:

The analyst(s) whose name appears on this research report certifies that 1) all of the views expressed in this report accurately reflect his (their) personal views about any and all of the subject securities or issuers discussed; and 2) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst in this research report; and 3) all Dawson James employees, including the analyst(s) responsible for preparing this research report, may be eligible to receive non-product or service-specific monetary bonus compensation that is based upon various factors, including total revenues of Dawson James and its affiliates as well as a portion of the proceeds from a broad pool of investment vehicles consisting of components of the compensation generated by investment banking activities, including but not limited to shares of stock and/or warrants, which may or may not include the securities referenced in this report.
